The European Union's energy storage sector has witnessed significant advancements, particularly in 2023, with a record-breaking milestone of over 10 GW of cumulative storage installations. This growth is driven by the increasing adoption of battery storage technologies, especially in residential sectors across Europe, with Germany, Italy, and the UK leading the charge.

The International Energy Agency's (IEA) recent report, "Batteries and Secure Energy Transitions," highlights the critical role batteries will play in fulfilling the ambitious 2030 targets set by nearly 200 countries at COP28, the United Nations climate change conference. As a partner to industries in exploiting the potential of battery technology, ABB innovations are taking center stage in ...

Pre-Con Energy Storage Integration Council Strategy Meeting During the 2024 conference, several hundred attendees joined a pre-conference strategy meeting hosted by the Energy Storage Integration Council (ESIC). The mission of the ESIC is to advance the deployment and integration of energy storage systems through open, technical collaboration.
