Another advantage of solar energy that strengthens every other point on this list is the long, warrantied lifespan of today's solar panels. Modern solar panels typically have a 25-year manufacturer's performance guarantee that ensures the panels maintain a certain level of output - typically 85% - throughout their warrantied life.

Devices called solar furnaces and solar cells can turn solar energy into electricity. A solar furnace uses the Sun's heat to make electricity. It has mirrors that focus large amounts of solar energy into a small area. A solar furnace can produce temperatures of up to 3,630°F (2,000°C). This heat can be used to make steam.

Instead, the solar panels, known as "collectors," transform solar energy into heat. Sunlight passes through a collector's glass covering, striking a component called an absorber plate, which has a coating designed to capture solar energy and convert it to heat. The heat is transferred to a "transfer fluid" (either antifreeze or potable water ...
