Technically, an amp hour is simply a measure of how long a battery can provide one amp of power per hour. You will see it abbreviated as Ah or mAh for milli-amp hours in small applications. Unfortunately, most of the devices we rely on do not draw exactly one amp of power per hour, so an amp hour is not a particularly useful rating in this form.

This conversion becomes handy when you possess a watt-hour rating but necessitate the battery's capacity in amp hours. How Many Watt Hours in a 100 Ah Lithium Battery? The watt-hour rating of a 100 Ah lithium battery hinges on its voltage. For instance, a 12-volt 100 Ah lithium battery yields 1,200 watt-hours (Wh) of energy (100 Ah \times 12V ...

Enter the battery capacity in amp-hours (Ah): If the battery capacity is given in watt-hours, divide the watt-hours by the battery voltage to find out the amp-hours. For example, enter 50 for a 50Ah battery. ...
