Project Title: California Offshore Renewable Energy TN #: 249906 Document Title: Energy Commission Report on AB 525 Offshore Wind Permitting Roadmap Description: Assembly Bill 525 Offshore Wind Energy Permitting Roadmap Filer: susan fleming Organization: California Energy Commission Submitter Role: Commission Staff

The California Energy Commission's Reliability, Renewable Energy & Decarbonization Incentives Division (RREDI) develops and administers the state's renewable energy, grid reliability, and building decarbonization incentive programs, which are helping California achieve its 100 percent clean energy goal and combating climate change.

Senate Bill (SB) 100 established a landmark policy requiring renewable energy and zero-carbon resources supply 100 percent of electric retail sales to end-use customers by 2045. It requires the California Energy Commission (CEC), California Public Utilities Commission (CPUC), and California Air Resources Board (CARB) to prepare a report to the ...

Executive Director, California Solar Energy Industries Association "Transitioning to a 100% carbon-free future in an economy the size of California's requires persistence, commitment, and vision. ... "The California Environmental Justice Alliance is excited about the expansion of renewable energy with SB 100, hat will transition our state ...

ASSEMBLY COMMITTEE ON UTILITIES AND ENERGY Eduardo Garcia, Chair AB 2316 (Ward) - As Amended March 28, 2022 SUBJECT: Community Renewable Energy Program SUMMARY: Mandates the California Public Utilities Commission (CPUC) establish a Community Renewable Energy Program (CREP), as specified, by July 1, 2023 for distribution

The 100 Percent Clean Energy Act of 2018 established as a policy of the state that eligible renewable energy resources and zero-carbon resources supply 100% of retail sales of electricity to California end-use customers and 100% of electricity procured to serve all state agencies by December 31, 2045.

RECs are certificates of proof associated with the generation of electricity from an eligible renewable energy resource. Electricity retail suppliers buy and sell RECs for compliance with California's RPS program, as well as for voluntary purposes. ... PSDprogram@energy.ca.gov 916-653-6222. California Energy Commission 1516 9th Street, MS-45 ...

By Jeff Billinton, CAISO at the Energy Commission staff workshop on offshore renewable energy 21 page(s) CEC/Docket Unit: California ISO: 216327: 3/2/2017: Presentation - California Offshore Renewable Energy (CORE) By Jean Thurston from the Bureau of Ocean Energy Management and Scott Flint of the California

Energy Commission on 3-3-17 ...

California's clean energy agenda is ambitious, and we are exceeding many of our preliminary targets years ahead of schedule. But to reach our ultimate goal of 100% clean electricity by 2045, we need to build more clean energy, ... 33% renewable energy . Reduce greenhouse gas emissions to 1990 levels . 1.5 million zero-emission vehicles sold ...

(1) The Public Utilities Commission recognized the need for more firm renewable energy resources and firm zero-carbon resources in Decision 21-06-035 (June 30, 2021) Requiring Procurement to Address Mid-Term Reliability (2023-2026), (2023-2026), which requires the procurement of 1,000 megawatts of new, firm renewable power and 1,000 megawatts of ...

California has long been a leader in the development of renewable energy and the transition to a carbon-free economy. The State recently demonstrated its continuing leadership with the enactment of a new law that may streamline environmental review and permitting for solar PV, terrestrial wind, energy storage and alternative (i.e., non-fossil and non-nuclear) fuel ...

generation, add technology diversity to the state's renewable energy and zero-carbon resource portfolio, and help California meet its ambitious climate and energy goals. This report is the first of four work products the CEC is directed by AB 525 to prepare.

This plan includes a combination of renewable energy sources, energy storage, demand response, grid modernization, and interregional transmission, which are all essential components of California's transition to a cleaner, more ...

- Katelyn Roedner Sutter, California State Director, Environmental Defense Fund (EDF) "We stand ready to partner with the Governor on implementing this ambitious plan while growing living-wage clean energy jobs. IBEW's close partnership with the state will help California lead the world in building a clean energy future for decades to ...

The CEC supports the modernization of California's energy system by investing in science and technology that aligns with the state's policy goals. These investments support advancements in energy efficiency, renewable energy, storage technologies, energy- related environmental

SB 100 (De Leon, 2018), the 100 Percent Clean Energy Act of 2018, requires California's renewable energy and zero-carbon resources to supply 100 percent of electric retail sales to end-use customers, and 100 percent of electricity procured to serve state agencies, by 2045. The bill requires that the transition to a 100% renewable and zero ...

Organization: California Energy Commission Submitter Role: Commission Staff Submission Date: 8/21/2023 8:47:37 PM Docketed Date: 8/22/2023 ... such as offshore wind, long-duration energy storage, clean and

## Ab100 california renewable energy

renewable hydrogen technologies, and demand flexibility. 3) Assess environmental, social, and economic costs and benefits of the ...

(2) The quantities of eligible renewable energy resources to be procured for all other compliance periods reflect reasonable progress in each of the intervening years sufficient to ensure that the procurement of electricity products from eligible renewable energy resources achieves 25 percent of retail sales by December 31, 2016, 33 percent by ...

Assembly Bill 2514 also required the California Public Utilities Commission (CPUC) to open a proceeding to determine appropriate targets, if any, for the state's investor-owned utilities to procure viable and cost-effective energy storage systems and, by October 1, 2013, to adopt an energy storage system procurement target, if determined to be appropriate, to be achieved by ...

California is leading the nation toward a 100 percent clean energy future and addressing climate change for all. The Energy Commission plays a pivotal role by developing and mandating programs that use renewable energy, incentives for energy technology installation, renewable energy grants, and by ensuring the efforts benefit all Californians.

As intermittent renewable energy supplies like solar and wind become a larger part of California's energy portfolio, the need for additional "demand response resources" will increase to help balance the inconsistent generation of renewable power as the sun goes behind clouds or the wind dies down.

Renewable energy supplied 36 percent of retail electricity sales in California in 2020. If we also account for energy from large hydroelectric and nuclear sources--which are considered "zero carbon" but not renewable for RPS purposes--zero-carbon sources supplied a total of 59 percent of retail electricity in 2020. Over the last decade ...

became effective, setting the analytical framework for offshore wind energy development off the California coast in federal waters and tasked the California Energy Commission (CEC) with developing a strategic plan for offshore wind development. The strategic plan must include, at a minimum, the following five chapters:
