

Alabama solar energy

Does Alabama have a solar tax credit?

Many state governments support energy efficiency and alternative energy sources; unfortunately, the Alabama Public Service Commission does not have any programs currently in place to save money at the state level. Alabama residents can take advantage of the Federal Solar Tax Credit and get a discount of 30% applied to their tax returns.

What is the best Alabama solar incentive?

The best Alabama solar incentive is the Federal tax rebate program. This is the only option that will help you save thousands of dollars on the cost of your solar installation in the state of Alabama.

Does Alabama have solar power?

Alabama ranks No. 35 among states in terms of total solar power, mostly thanks to a handful of large projects, such as the Walmart-funded solar farm in Chambers County, and installations at military bases.

Does Alabama offer a solar rebate?

At the current rates, the Alabama Power rate PAE and rate rider RGB mean a solar purchase in Alabama won't pay back its initial investment until after 15 years. Not much of an incentive at all. Unfortunately, Alabama does not offer any cash rebates for solar panels. The state does have one fairly decent solar incentive, however...

How much does a solar array cost in Alabama?

The average cost of a complete solar array in the state of Alabama is about \$42,780 without any incentives, which is around \$12,000 higher than homeowners pay in other states. This is mostly due to larger-than-normal systems required in this Southern state. But thanks to incentive programs, that won't represent your true cost.

Is Alabama a good state for solar?

According to the SEIA's state residential solar data, Alabama ranks 49th out of 51 among U.S. states, plus Washington D.C. A separate group, the Southern Alliance for Clean Energy ranked Alabama last among Southeastern states in total solar development in its fourth annual Solar in the Southeast report, released last week.

The pv magazine USA tour of solar incentives state by state last stopped in Tennessee, and now moves onto Alabama. Nicknamed "The Heart of Dixie," Alabama lacks the framework that Georgia, Florida and other Southern states now share for rooftop solar, while the state's striated utility market makes for limited development of large utility-scale and corporate ...
