How do I choose a solar company for my home?

You can estimate how much energy your home requires by using the median size of a Jacksonville household, which is 1,859 square feet, and the average energy usage per household in Florida, which is 1,096 kWh per household. This will help you choose a solar company that can meet the needs of your home while staying within your budget.

Can I install solar panels myself?

While you can technically purchase and install solar panels yourself, we don't recommend it. Improper installation can void your warranty, as well, leaving you to pay for damaged panels. In some states, this type of installation also requires a specialized solar contractor license.

How much does a solar panel repair cost?

Most homeowners spend between \$200 and \$1,250 on solar panel repairs or an average of \$720. But what you'll pay for solar repairs depends on the type of panel, its size, and the extent of its damage. Small fixes could cost as little as \$100, while extensive repairs or replacements could add up to \$3,600 or more.

The average cost to install solar panels is around \$26,600, and most homeowners pay between \$4,500 and \$53,000. Keep in mind that these prices don't consider the federal investment tax credit (ITC), which can effectively reduce those costs by up to 30%.

Some solar companies rely on subcontractors to perform some-or all-the work during your solar installation. Don't let this put you off: It's entirely standard procedure in the industry. What is alarming, though, is a lack
