

In June 2023, Brazil became the second country to benefit from the Climate Investment Funds' (CIF) Renewable Energy Integration program (REI). The country will access \$70 million in highly concessional capital to finance clean energy integration solutions, accelerating an ambitious green energy transformation in Brazil. As part of the plan, the ...

"The staff at Atlantic Renewable is delighted to become part of PPM," said Theo de Wolff, former principal of Atlantic Renewable and now Managing Director of PPM Atlantic Renewable. "With a project pipeline of more than 500 MW in development in the Northeast with on-line dates between 2005 and 2010, we are eager to combine strengths to work ...

Atlantic Ocean. Image by Andr   Motta de Souza / Petrobras News Agency ... the wind measurements in the country's pre-salt region to collect data for potential wind projects offshore southern Brazil. ... Renewables Now is an independent one-stop shop for business news and market intelligence for the global renewable energy industry. Learn more ...

The IRENA statistics team would welcome comments and feedback on its structure and content, which can be sent to ...

Actis has sold Atlantic Energias Renovaveis, one of the largest renewable energy businesses in Brazil. Actis acquired 60% of Atlantic Energias Renovaveis S/A ("Atlantic") in September 2013 and consolidated its ownership position to 100% of the company in 2016, via the acquisition of the shares held by minority shareholders Pattac and Servinoga.

Brazil's competitiveness in renewable energy can also give it an advantage in the production of green hydrogen (GH2), since the cost of renewable energy is 70% of the production cost of GH2. Brazil can become one of the major global GH2 producers because of the low cost derived from its natural resources and its clean and integrated power ...

5.1.1 Introduction. Conflicts between renewable energy sources and other environmental interests can be solved at the level of structuring land uses for different purposes (designation of the land for crops to produce biomass or agriculture, human settlements, or nature conservation, for instance) and project licensing.

The joint power generation of the projects increases the installed capacity of non-conventional renewable energy and the diversification of the energy matrix in Brazil. Production will be approximately 440 GWh per year, enough to meet the energy demand of a city of 750,000 inhabitants, and will contribute to reducing the

equivalent of 35,000 ...

Central Atlantic Planning Area shapefile download. Call for Information and Nominations. On April 27, 2022, BOEM announced the publication of a Call for Information and Nominations (Call) to assess commercial interest in -- and obtain public input on -- potential wind energy leasing activities in federal waters of the Central Atlantic.

Brazil's Ministry of Mines and Energy approved six renewable energy plants, with a combined capacity of 165 MW, to join the national Incentive Regime f. ... With a 27-MW capacity each, the plants are part of the 195-MW Lagoa do Barro wind complex, owned by local firm Atlantic Energias Renovaveis SA. According to government documents ...

Brazil's renewables firm Atlantic Energias Renovaveis SA started operation of its 180-MW Morrinhos Wind Complex and the construction works at the 207-M ... Renewables Now is an independent one-stop shop for business news and market intelligence for the global renewable energy industry. Learn more.. Premium access. Gain unlimited access to know ...

Background Achieving climate targets will require a rapid transition to clean energy. However, renewable energy (RE) firms face financial, policy, and economic barriers to mobilizing sufficient investment in low-carbon technologies, especially in low- and middle-income countries. Here, we analyze the challenges and successes of financing the energy transition in ...

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. ... Brazil: Energy intensity: how much energy does it use ...

Brazil pushed forward on renewable energy in 1997 with Law 9478, which established the use of renewable energy sources as a pillar of the country's energy policy. ... Since the acquisition of three wind farms from Italian Enel, and the Brazilian company Atlantic Energias Renov&#225;veis in 2019, China General Nuclear Power Group (CGN) is the ...

Brazil is the ninth-largest economy in the world<sup>53</sup> and ranks 14 out of 120 countries on the ETI 2023. The overall ETI score for Brazil has seen an 8% ... The Auctions for Renewable Energy Support programme was launched in 2004 to encourage the installation of new renewable energy projects through a competitive bidding process. These auctions ...

GE Renewable Energy announced it has signed an agreement with ENGIE to supply 144 of its 2.5-116 turbines for the Umburanas Wind Farm Complex in upstate Bahia, Brazil. This 360-MW wind installment will add to the 326.7 MW under commissioning by GE at the neighboring Campo Largo I wind farm (also owned by ENGIE). "Together, these...

On August 14, 2024, the United States Bureau of Ocean Energy Management ("BOEM") held its Central Atlantic offshore wind auction for two lease areas off the coasts of Delaware, Maryland and Virginia. The auction lasted seven rounds and resulted in two provisional winners: Equinor Wind US LLC and Virginia Electric and Power Co, with the winning bids totaling \$92.65 million.

China's CGN eyeing 3 GW of renewables in Brazil by 2024 - report. Brazilian solar park. China General Nuclear Power Group (CGN) plans to increase its Brazilian renewable capacity to 3 GW by 2024, CGN Brasil Energia's vice-president Gabriel Luaces told Reuters on Wednesday. ... Renewables Now is an independent one-stop shop for business news and ...

Hydroelectric power plants produced almost 80% of the electrical energy consumed in Brazil (now 60%). [10] Brazil has the third highest potential for hydroelectricity, following Russia and China. [11] At the end of 2021 Brazil was the 2nd country in the world in terms of installed hydroelectric power (109.4 GW). [12] Although the dams produce large amounts of electricity, they can also ...

PPM Energy, the U.S. competitive subsidiary of ScottishPower (NYSE: SPI), announced the acquisition of Richmond, Virginia-based Atlantic Renewable Energy Corporation and its wind development portfolio as a wholly owned subsidiary of PPM, called PPM Atlantic Renewable. PPM Energy, Inc. is now part of IBERDROLA RENEWABLES, S.A., and has changed its ...

The government plans to leverage Brazil's abundant renewable energy sources, including wind, solar, hydro, biomass and green hydrogen, to foster sustainable industrial growth.. Following the PNTE approval, Thiago Barral, Secretary of Energy Transition at the Ministry of Mines and Energy, announced the creation of the National Energy Transition Forum (Fonte) to involve ...
