Does Bahrain have solar energy?

Given Bahrain's climate, solar energy is a vital part of the kingdom's clean energy mix, accounting for 93% of its renewable capacity in 2020. In November 2021 the government inaugurated the Batelco solar plant, which can produce some 1600 MW of power and is expected to reduce the country's carbon emissions by around 900 tonnes.

Why is Bahrain's energy consumption so high?

According to industry research firm Enerdata, Bahrain's aluminium and petrochemical industry alone is responsible for 60% of energy consumption, and is the main reason why Bahrain's per capita energy usage is the highest in the world.

Does Bahrain produce a lot of oil?

Though Bahrain does not produce as much oil as its larger neighbours, the energy industry remains a vital part of the national economy. This has been helped by a large-scale oil and gas discovery in 2018 and the upgrade of the country's main refinery in Sitra.

Which energy storage solutions will be the leading energy storage solution in MENA?

Electrochemical storage (batteries) will be the leading energy storage solution in MENA in the short to medium terms, led by sodium-sulfur (NaS) and lithium-ion (Li-Ion) batteries.

Does Bahrain have a hydrogen industry?

Bahrain has taken its first steps to develop a domestic hydrogen industry. In November 2020 the kingdom signed an agreement with hydrogen producer Air Products to assess the potential development of a hydrogen economy in the country. The SEA unveiled plans for a 4-MW green hydrogen plant in December 2021, which would be a first for the region.

Does GPIC use natural gas in Bahrain?

GPIC uses readily available natural gas in Bahrain as a feedstock for the production of ammonia, urea and methanol. ASRY is the Arabian Gulf's leading maritime repair, fabrication, and engineering facility for ships, rigs and marine assets. We are evolving to meet the energy needs of tomorrow.

EWA is planning to contract a 3-5 MW project combining solar and wind power. In addition, a 5 MW solar project is being developed at the University of Bahrain.
