

Basic salary for energy storage industry sales

How much do energy jobs pay per hour?

Regardless of the relatively small differences between sectors, an important point is that all energy jobs pay well above the national average of \$19 per hour, and the non-extractive sectors are growing swiftly. The future of extractive industries' employment is much less certain.

Why is the energy industry focusing on high-paying jobs?

As the U.S. economy recovers from the COVID-induced recession, the emphasis is shifting away from the simplified metric of the number of jobs, toward a focus on high-quality, high-paying jobs. As some service sectors languish with unfilled positions and shorthanded staffing, the energy industry pays premium wages.

What is the smallest employment sector in the energy industry?

Wind energy is the smallest employment sector in the energy industry, though it's a reasonable bet that wind will surpass coal in the near future. Grid jobs employ over 800,000 people who plan, build, and maintain the nation's electricity network; this is a massive sector and one that's frequently overlooked.

Are energy jobs in high demand?

The coming boom in energy jobs has a lot to offer: Long-term employment with high wages, new technologies, and investment in the future of American energy. And these jobs will result in less pollution for everyone. Also see: 'Which climate change jobs will be in high demand in the future?'

Is solar energy a better job than oil & gas?

Extraction is the largest occupation within the coal industry, and it's important to note that coal employs far fewer people than oil and gas. Construction jobs dominate the solar industry, which explains why solar energy, overall, has lower wages compared to fossil fuels. Construction is a lower-paying occupation than oil and gas extraction.
