

Battery tender for lithium ion

Are battery tenders compatible with lithium?

There are indeed battery tenders compatible with lithium, boasting features like lithium-specific charging modes and built-in battery management systems (BMS). These features ensure the delicate dance of lithium charging is performed flawlessly, preventing overcharging, overheating, and other potential disasters.

Are all battery tenders the same?

Remember, not all tenders are created equal. Lead-acid battery tenders operate at significantly higher voltages and charging rates than those suitable for lithium. Using the wrong one on your lithium battery could be disastrous, leading to overcharging, overheating, and even fire.

What is a battery tender ® junior?

The Battery Tender® Junior is the perfect versatile charger for your powersport vehicle! This 12 Volt, 800mA charger is capable of switching between charging AGM, lead-acid, gel cell, flooded, and lithium (LiFePO4) batteries. Smarter than a trickle charger, our Junior model won't overcharge or damage your battery when connected for too long.

Why should you tender a lithium battery?

Maintaining optimal battery health: Regular tendering minimizes sulfation, a process that deteriorates lead-acid batteries, and helps lithium batteries retain their capacity over time. But hold on! Remember, not all tenders are created equal.

Which lithium battery charger should I use?

Lithium Iron Phosphate (LiFePO4) is the most common and generally considered "tender-friendly," while others like Lithium Polymer (LiPo) might require specialized chargers. Always consult your battery's manual or manufacturer for recommended charging methods. Tender Capabilities: Not all tenders equipped for lithium batteries are the same.
