Rock-solid stability with 2 strong 12V-rails; DC-to-DC technology for tight voltage regulation; 2 PCIe connectors for powerful GPUs; Temperature-controlled 120mm fan reduces system noise; Stand-by drain of less than 0.15 watts

The previous generation System Power units met competition offerings eye-to-eye, but the new generation cannot do that. Epilogue. So far, I used to recommend the System Power 9 units to users needing a good and affordable PSU. This means that I expected much from System Power 10, only to be disappointed.

Yes, the PSUs from Bequiet are pretty good. I have the same Power Supply myself, but the 400W variant. They're barely audible while still being very reliable. If you aren't sure if you have enough wattage for your system you can check on bequiet's website. They have a PSU calculator which also suggests their PSUs based in your build.
