

Best time for solar panels

When should you install solar panels?

If you don't mind longer wait times and slightly higher installation fees and prefer to start bankrolling solar credits right away, you'll want to install solar panels during the summer. But if you're looking for shorter installation times and lower fees, you should wait for the spring or fall.

When is the best time to go solar?

Fall and winter are slower for the opposite reasons - less sunlight, little to no A/C, and lower energy bills. But that's exactly what makes it the best time to go solar, especially for proactive customers who want to set themselves up for peak summer bills. Think of shopping for solar panels like going out for breakfast.

When is the best time to buy solar panels?

Just like buying a house, solar is a long-term investment and there's more to be lost than gained by trying to time the market. The best time to buy solar panels is when you are ready to make an investment in your future. However, if you are trying to choose a time of year to start your search, fall and winter provide some unique advantages.

When is the best time to install a solar energy system?

Solar companies are most busy during the height of summer, pushing more ads and doing the most installations and repairs during this time. As a result, you may wait several weeks before your solar energy system can be installed, even longer in high-traffic states like California, Texas, or Arizona.

Is it a bad time to install solar power systems?

Overall, there is no bad time to install solar power systems, as you'll be making a major step toward paying lower electricity bills, producing clean energy, and improving the value of your home. But, there are times throughout the year that installations are less optimal.

When is the best time to switch to solar?

Summer is typically the busiest time of year because with the sun shining, air conditioners humming, and peak utility rates in effect, homeowners get their biggest electricity bills of the year and react by switching to solar. Fall and winter are slower for the opposite reasons - less sunlight, little to no A/C, and lower energy bills.

Buying a solar energy system will likely increase your home's value. A recent study found that solar panels are viewed as upgrades, just like a renovated kitchen or a finished basement, and home buyers across the country have been willing to pay a premium of about \$15,000 for a home with an average-sized solar array. Additionally, there is ...
