The state of Colorado's largest wind energy center. This 600-megawatt wind farm constructed by Blattner in eastern Colorado near the town of Limon, 80 miles east of Denver, became the largest wind facility in Colorado when it came into service in 2014. Constructed in three phases, the 368-turbine project extends across more than 104,000 acres.

Setting The Standard For Clean Energy In The Southwest. One of the largest wind farms ever constructed in the United States is in New Mexico. Western Spirit Wind included four wind energy project sites -- Red Cloud, Duran Mesa, Clines Corners and Tecolote. The 1,050-megawatt Blattner-built project has the most wind power ever constructed as a single phase in North ...

Every employee at Blattner learns what it means to work up and to the right. They take ownership of their work, solve problems, work together and deliver beyond expectations. When you're a member of the team, everything you do makes a difference.

The Marion, Ohio, native found an opportunity at a Blattner Energy solar project near Bowling Green, Ohio, in 2016 and hasn't looked back. She started as a wire management laborer and has worked her way up to being a commissioning superintendent. Foust's story of discovery and perseverance is one worth highlighting for Women In Construction ...
