

Boston signs on to renewable energy initiative

A new ballot initiative aims to overturn legislation giving state regulators, not municipal governments, final say over large-scale solar and wind projects. ... Renewable energy advocates say moving final decisions on projects to the state level is crucial for overcoming the divisive politics and intimidation that have impacted township ...

On July 7, Virginia Governor Ralph Northam launched the "Clean Energy Virginia" initiative, which expands on Executive Order Forty-Three, signed in September 2019. Executive Order Forty-Three established statewide goals for clean energy deployment and expanded on the Commonwealth's commitment to reducing its environmental impact. One of the goals ...

On July 10, 2024, the Massachusetts Department of Energy Resources (DOER) released the 2024 Solar Massachusetts Renewable Target (SMART) program Straw Proposal. The DOER's Straw Proposal includes numerous substantive changes to the current SMART program and sets forth additional efforts aimed at improving the program's implementation. More information can ...

The Large Building Green Energy Retrofits Program is part of a larger \$20 million initiative to embed deep energy retrofits in Boston's existing building stock. Over the coming months, the City will be building upon this work with a retrofit program for smaller residential buildings as well as a program specific to retrofitting the Boston ...

Initiative aims to unlock up to \$850 million in catalytic investments to advance clean energy manufacturing capacity across Africa Launched at Abu Dhabi Sustainability Week, the Initiative is supported through a strategic partnership between Sustainable Energy for All, the African Climate Foundation, Bloomberg Philanthropies, ClimateWorks Foundation, and the ...

Reflections on the Decades-Long Underestimation of Growth in Renewable Energy. ... The economics of renewable energy is changing rapidly. In 2018, common consensus reflected in the Economics in Context Initiative's (ECI) ... Boston University Global Development Policy Center One Silber Way, 8th Floor, Boston, MA 02215.

A durable energy transition: How to stay on track in the face of increasing demand and unpredictable obstacles This year's in-person conference explores how we can sustain a durable energy transition and stay on track in the face of increasing demand and unpredicted obstacles. We will look at the implications of geopolitical shifts, such as... Read more

Yazeed Al-Humied, Deputy Governor and Head of MENA Investments at PIF, stated, "These agreements are

Boston signs on to renewable energy initiative

part of PIF's commitment to localize advanced renewable technologies in Saudi Arabia, aiming to achieve 75% localization of renewable project components by 2030, as outlined in the Ministry of Energy's National Renewable Energy Program.

European donors are increasingly focused on promoting renewable energy in South Africa, particularly in regions heavily reliant on coal. This initiative aims to address both the socio-economic challenges and opportunities associated with transitioning to greener energy sources. Engaging local communities is crucial for the success of renewable ...

Mayor Martin J. Walsh today announced his plans to issue a Request for Information (RFI) for competitive pricing of large-scale renewable energy projects. The RFI will compile the energy demand data across participating U.S. cities and ask renewable energy developers for price estimates for projects that would meet their collective energy demand. ...

The United States is committed to tackling the climate crisis through the deployment of cost-cutting clean energy technologies at home and abroad. As countries gathered for "Energy Day" at the 27th Conference of the Parties to the UN Framework Convention on Climate Change (COP27) in Sharm el-Sheikh, the United States continued to demonstrate ...

The African Development Bank's \$25 million loan empowers Seychelles to achieve 100% renewable energy by 2035. This initiative fosters job creation, community engagement, and sustainable practices in response to climate change.
