

Brian hess solar company

Hess Oil and Chemical was founded in 1933 by Leon Hess as an operation out of Asbury Park that sold refining leftovers to hotels as heating fuel. [4] [9] In 1938, he purchased land in Perth Amboy for his first oil storage terminal and in 1958 opened the company's first refinery, located in Port Reading. [11]The company went public in 1962 after merging with the Cletrac Corporation, ...

“After speaking to several solar companies, I decided to go with HES based on the roofing company I contracted. Brian and the team at HES were professional and friendly, they worked closely with the roofing company to make sure they were able to install the solar system simultaneously as my roof was being replaced to minimize future roofing issues.

Since our launch, we have directed all our efforts into becoming a remarkable paving company, The Pavement Group has quickly evolved into an institution and has become the most advanced pavement management company in the country. Brian Hess, the CEO, realized early on that offering a la carte pavement-related services will only take the company ...
