How can Egypt store electricity?

Egypt has been looking at a number of ways to store electricity as part of its ambitions to grow renewable energy capacity to cover 42% of the country's electricity needs by 2030. These include upgrading its power grid and incorporating pumped-storage hydroelectricity stations to help store electricity for future use.

## Does Egypt need EEHC & Scatec?

The Egyptian Cabinet has already approved the cooperation agreementbetween EEHC and Scatec. This decision aligns with the government's commitment to increasing the country's renewable energy capacity. By embracing projects like the solar and battery storage initiative, Egypt aims to diversify its energy sources and reduce its carbon footprint.

## Will Benban inspire investors to build more solar projects in Egypt?

After his firm completed a Benban project for the company IB Vogt, Elsheikh soon heard from other developers that needed help with their own projects there. He says Benban has already started to inspire investors to consider building more utility-scale solar PV projects in Egypt.

## Is Egypt a good place to invest in solar energy?

Egypt has plenty of land and high solar yields,"making renewables highly competitive against other sources of energy," the Scatec spokesperson said. But the main limiting factor is the high cost of financing as a result of rising global interest rates, they added.

## Can batteries solve Egypt's Electricity oversupply problem?

Egypt is exploring the potential of energy storage through batteries to combat our electricity oversupply problem: As Egypt continues to suffer from a major oversupply of electricity, the country is in need of new ways to tackle the issue.

#### Is Egypt a good PV market?

Osmundsen said that Egypt is fundamentally an attractive PV marketbut the country's current economic crisis, including a severe currency depreciation, is making foreign investment difficult.
