

Can i move my solar panels to my new house

Can I move my solar system to a new home?

It's best to use the same company that originally installed your solar panels when moving your system to a new home. The experienced solar technicians from the company will know how to safely remove, transport, and reinstall the solar panels in the most efficient way possible.

Can solar panels be moved?

Since they don't operate in your new neighborhood, you won't be able to have them move your solar panels. In that case, you'll either have to move the solar panels yourself or hire a third party to move them for you. Either way, your warranty will be voided, so it will probably make more sense to leave the panels in place.

Should I bring my solar power system to a new home?

If you are moving to a new home and want to bring your solar power system with you, the project may take a little longer overall, as you have to factor in the amount of time needed to remove, store, transport, and reinstall the solar panel system once you are in your new home.

What is the cost to move solar panels?

The cost to move solar panels (removal, disassembly, packing, shipping, and reinstallation) can range from \$4,000 to \$8,000, depending on the size of the system and the distance to the new home. Besides, you need to cover the cost of repairing the roof of your old home where the panels were originally fitted and the cost of any required permits.

Can a solar company move my solar system?

If you're moving within the service area covered by your solar company, you should be able to have them move the solar system for you. Of course, this won't be free. But you'll have the peace of mind of knowing that the process is being handled by qualified professionals.

Can solar panels be damaged during a house move?

Solar panels are extremely fragile and contain delicate electrical wiring. The risk of damaging the photovoltaic modules during removal, disassembly, packing for shipping, and transportation to another place is high. If not handled properly, your solar equipment can be completely ruined during your house move.
