Cycle COLLECTION ONLY. Availability: In stock - COLLECTION ONLY

Solar array mounted on a rooftop. A solar panel is a device that converts sunlight into electricity by using photovoltaic (PV) cells. PV cells are made of materials that produce excited electrons when exposed to light. The electrons flow through a circuit and produce direct current (DC) electricity, which can be used to power various devices or be stored in batteries.

For example, a 100-watt flexible solar panel is often used on boats, while 200-300-watt products are used on RVs or off-grid shacks. To meet their solar power needs, users often connect several solar panels to get the combined wattage they want. The solar panel wattage is directly proportional to its cost.
