Advanced technology for a utilities world that never sleeps Optimize time and maintenance costs in your industrial plants. EnerSys® delivers the most effective, powerful and reliable batteries available, even in the harshest environments and extremes of temperature through innovation in UPS lead-acid battery backup technology.

What to Look For in an Uninterruptible Power Supply (UPS) Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day. However, typical desktop computers, routers, and similar devices still need to be plugged into a power source all the time to work. That's where an uninterruptible power supply (UPS) ...

UPS Battery Backup. In our range, you will find all of the uninterruptible power supplies that you require from line interactive UPS to online UPS systems. We also stock an extensive selection of UPS battery replacements and 3 phase UPS systems.. Our selection includes leading manufacturers such as APC, Eaton and Riello, ensuring you receive nothing less than ...

A UPS (Uninterrupted Power Supply) is a backup battery that keeps the equipment plugged into it running in the event of a power outage. It's not just a glorified power bank, because the UPS detects interruptions in the power and automatically switches the connected devices to running off the UPS battery, so they don't shut down. This makes ...

A UPS can ensure that you have reliable power at all times, and it can also protect your hardware and network systems from damage, in the event of emergency power interruptions. In such situations, electricity to power computers and other critical devices can be supplied for long enough to ensure they can properly shut down and backup data.

Back-up Power UPS Applications Eaton is an intelligent power management company dedicated to improving the quality of life and protecting the environment for people everywhere. We are guided by our commitment to do business right, to operate sustainably and to help our customers manage power - today and well into the future.

Uninterruptible Power Supply (UPS) Much like a standby generator, UPS provides backup power to businesses in the event of a power cut, keeping your systems running without interruption and protecting them against power surges. However, because they tend to be powered by a battery, UPS systems can't supply power for as long as a generator.
