

# Company claims solar credit and passes on savings to client

Can a business claim a solar tax credit?

These upgrades can provide long-term energy cost savings for your business, but often involve large up-front payments. Claiming the solar tax credit can provide tax savings to ease the burden of the initial outlay. This guide explains the solar tax credit for businesses, which expenses qualify, and how to claim the credit.

How does a solar tax credit work?

Form 5695 calculates the residential solar tax credit as part of the nonbusiness energy property credit. The nonbusiness energy property credit then goes on schedule 3 of Form 1040. The solar tax credit offers significant tax savings. The credit percentage reduces after 2022, so plan now to secure maximum savings for your business.

Can a solar business transfer tax credits?

Tax credits carried backward or forward are not eligible for "transferability" (i.e., cannot be sold). If a business does not have a large tax liability, tax equity financing may allow the business to take full advantage of federal tax benefits for a solar system.

Are solar panels a tax credit?

This federal tax credit isn't new, but it was modified and extended by 2022's Inflation Reduction Act, bumping up its value to 30% of the cost of qualified improvements. If you're considering adding rooftop solar panels to your home, here are the details on how to claim this tax credit. [What Is the Tax Credit for Solar Panels?](#)

Is the solar tax credit refundable?

No. The solar tax credit can save you money on your tax bill, but the amount of your credit can't exceed the total amount you owe. That's because the credit is "nonrefundable," in tax speak. Put simply, if the credit reduces your overall tax bill below zero, the IRS is not going to cut you a check for the difference.

How does the solar tax credit rollover factor work?

How the tax credit rollover factor works. Currently, the federal tax credit is set at 26% of the net cost of the system for eligible homeowners if their solar system is installed by December 31, 2021. However, your clients may be able to apply the leftover amount as a carry-over into the next tax year.

Take extra care when calculating the amount of credit you're eligible for. Errors could result in an inaccurate claim or missed savings. Multiple Claims of the Solar Tax Credit. If you have multiple properties or installations equipped with solar panels, you might wonder if it's possible to make multiple claims for the solar tax credit.

Specifically, projects installed in 2021 and 2022 will continue to get the federal tax credit at 26%. The tax

## Company claims solar credit and passes on savings to client
