Marine batteries for electronics, starting outboards and powering 24-volt or 36-volt trolling motors have come a long way in the last 20 years. Where we basically had a cranking battery and a deep cycle lead acid battery for our trolling motors, now we have a plethora of options from AGMs to Lithium and of course still lead acids.

Especially the former two, as deep cycle batteries" ability to discharge longer and at a lower sustained voltage means they"re ideal for powering electrical systems over a long period of time. Low and slow, like cooking barbeque. They"re usually not suitable as car batteries, though, unless they"re a dual-purpose type.
