

Delisting from the energy storage sector

What is the future of energy storage?

"The Future of Energy Storage," a new multidisciplinary report from the MIT Energy Initiative (MITEI), urges government investment in sophisticated analytical tools for planning, operation, and regulation of electricity systems in order to deploy and use storage efficiently.

What technology risks do energy storage systems face?

Technology risks: While lithium-ion batteries remain the most widespread technology used in energy storage systems, these systems also use hydrogen, compressed air, and other battery technologies. The storage industry is also exploring new technologies capable of providing longer-duration storage to meet different market needs.

Can a PTC-electing energy production facility be paired with an energy storage facility?

Principally, this means that a PTC-electing eligible energy production facility (such as a solar facility now eligible to elect to use the PTC after the IRA) may be paired with an energy storage facility without impacting the ability to claim an ITC for the storage facility.

How many states have energy storage policies?

Around 15 states have adopted some form of energy storage policy, including procurement targets, regulatory adaptation, demonstration programs, financial incentives, and/or consumer protections. Several states have also required that utility resource plans include energy storage.

Should energy storage projects have multiple construction contracts?

Construction risks: It is common practice to see multiple equipment supply, construction, and installation contracts rather than one turnkey engineering, procurement, and construction (EPC) contract for energy storage projects.

Why is energy storage important?

As the report details, energy storage is a key component in making renewable energy sources, like wind and solar, financially and logistically viable at the scales needed to decarbonize our power grid and combat climate change.

Microvast is receiving more purchase orders from the US energy storage market than it can produce, the battery cell, pack and energy storage system manufacturer has said.
