

Difference between leasing and buying solar panels

What is the difference between buying and leasing a solar system?

The main difference between buying and leasing a solar system is who owns the system. When you buy solar panels, whether it be with cash or through a solar loan, you are the owner of the solar panels. With a solar lease or solar power purchase agreement (solar PPA), you don't have to pay any upfront costs to install solar panels on your roof.

Should I lease or buy a solar panel?

Whether you should lease or buy your solar panel depends on your budget, preferences and long-term plans. We'll dive into the logistics of leasing versus buying, who each option is best for and what you need to make an informed decision. Leasing solar panels costs less upfront, while purchasing them usually costs more out of pocket.

What is the difference between a solar loan and a lease?

If you purchase solar panels with a solar loan, you will have monthly payments. These payments however, will be fixed through the term of the loan. Solar leases, on the other hand, usually include a price escalator, which outlines the amount in which the monthly lease payments will increase each year.

Do solar leases cost the same a month?

Solar leases also don't cost the same from month to month, making it more difficult to keep the rest of your finances in order. Many solar leases also have price escalators, which are planned increases in your monthly payments over the lifetime of the lease.

How does a solar leasing company work?

The solar leasing company will handle the installation process, including obtaining necessary permits and approvals. Professional installers will mount the solar panels, connect the system to your electrical panel and ensure everything is operational. Installation usually takes a few days to complete.

Are solar leases worth it?

Solar leases and PPAs are often conflated, but they're slightly different. "In general, owning a solar installation is the best way to realize long-term financial benefits. Solar leases can be worth it in certain very specific circumstances," says Ben Zientara, a solar industry and policy analyst at SolarReviews.

When comparing buying solar panels or leasing, one significant advantage of buying solar panels is ownership. When you purchase a solar panel system, you gain full control, maximizing its benefits.
