

Do solar panels require maintenance

Do solar panels need maintenance?

Although solar panel systems don't usually require active or routine maintenance, some homeowners purchase a solar operations and maintenance (O&M) package for added peace of mind. O&M service packages are essentially insurance plans for your solar panel system that include things like cleaning, electrical system checks, and pest control measures.

Do solar panels need to be cleaned?

Solar panels are installed at an angle and naturally rinse off with rainfall, so they generally don't need to be cleaned. Still, things like snow, smog, dust, or dirt can cause a dip in your production, especially during times of low rain. In that case, cleaning your solar panels would be beneficial.

How often do solar panels need to be serviced?

While panels usually require very little solar maintenance, they still need to be serviced a few times a year. Since average yearly maintenance can cost around \$180, it's a good idea to budget and save for cleaning and repair costs.

Should I perform solar system maintenance on my own?

Do not attempt to perform solar system maintenance on your own! Not only is this a huge safety risk, it may void the warranties from your installer and/or manufacturer. In many cases, cleaning your solar panels should be very hands-off.

How long does a solar panel warranty last?

Solar panel warranties are usually good for 10-25 years and often outline which maintenance work is covered, so it's important to get familiar with the terms of the warranty. Additionally, DIY maintenance could invalidate the contract, so it's always best to contact a professional for maintenance, cleaning, and repair work.

What are the different types of solar maintenance?

Solar maintenance typically falls into two categories, cleaning and repairing, and both are required for peak solar efficiency. Since solar panels are always exposed to the elements, they can quickly become soiled with dirt and debris.
