Excerpts from Dr. Rodrigo's presentation: "Based on the latest data from the Sustainable Energy Authority, Sri Lanka's primary energy supply comprises 38.1% petroleum and 13.1% coal from imported sources, with indigenous sources contributing 32.0% biomass, 10.5% major hydro, and 6.3% new renewable energy.

Tower of power: gravity-based storage evolves beyond pumped hydro. Energy Vault has created a new storage system in which a six-arm crane sits atop a 33-storey tower, raising and lowering concrete blocks and storing energy in a similar method to pumped hydropower stations. How does the process compare to other forms of energy storage, such ...
