Locate and unplug the DSC Plug-In Power Transformer - this will remove Power from you system Disconnect the Battery in the Cabinet.. Wait a few day and really consider removing all the alarm components. A wired system has value. If you really want to remove it then all you do is disconnect the wire at the terminals on the PCB in the cabinet.

I am looking at replacing an older NAPCO system and have been researching this topic recently. The DSC Power 832 is pretty compatible with more modern hardware. You could add an updated keypad, like the DSC RFK5500, which would give you the ability to add wireless zones and a remote for arm/disarm as well.
