

Duke energy renewables sale

Is Duke Energy a Fortune 150 company?

Duke Energy (NYSE: DUK), a Fortune 150 company headquartered in Charlotte, N.C., is one of America's largest energy holding companies. Its electric utilities serve 8.2 million customers in North Carolina, South Carolina, Florida, Indiana, Ohio and Kentucky, and collectively own 50,000 megawatts of energy capacity.

Will Duke Energy sell commercial renewables business to Brookfield renewables?

Duke Energy has agreed to sell its Commercial Renewables business to Brookfield Renewable for about \$2.8 billion. The deal was announced on Monday, June 12 (Reuters).

Will Duke Energy sell its utility-scale renewables business platform?

Duke Energy is also finalizing the sale for its utility-scale renewables business platform, which it expects to close on by the end of 2023. Proceeds from both transactions will be used to strengthen Duke Energy's balance sheet and avoid additional holding company debt issuances.

How much will Duke Energy receive from the sale?

Duke Energy expects to receive net proceeds of about \$1.1 billion from the sale. The company plans to use these proceeds to incorporate more than 30,000 megawatts of regulated renewable energy into its system by 2035, strengthen its balance sheet, avoid additional debt, and improve grid reliability.

Will Duke Energy sell REC Solar?

"We have received indications of interest for the utility scale business at attractive valuations," Good said. Duke Energy expects to sell its distributed generation business, which includes REC Solar, separately, according to Good. The sale will likely follow a similar timeline to closing as the utility-scale sale, she said.
