Page 18 Choosing the Right Power Cord Long or thin cords can drain the power provided to an electrical device by the generator. When using such cords, allow for a slightly higher rated wattage requirement for the electrical device. See Figure 12 for recommended cords based on the power requirement of the electrical device. Page 19: Service Schedule

Plenty of Power - With 4,400 starting watts and 3,500 running watts, this unit can handle heavy loads, from lights and a refrigerator to a home air conditioner and high amperage power tools Powerful Engine - The DuroMax 210cc OHV engine is a workhorse that provides plenty of power to handle multiple jobs, from powering high voltage ...
