15. ADVANTAGES : 1. Solar energy is free although there is a cost in the building of "collectors" and other equipment required to convert solar energy into electricity or hot water. 2. Solar energy does not cause pollution. However, solar collectors and other associated equipment / machines are manufactured in factories that in turn cause some pollution.

3. POWER SYSTEM An electric power system is a network of electrical components used to supply, transmit and use electric power. Power systems engineering is a subdivision of electrical engineering that deals with the generation, transmission, distribution and utilisation of electric power and the electrical devices connected to such systems like ...

7. 1. Charge formation in clouds o During thunderstorms, positive and negative charges become separated by the heavy air currents with ice crystals in the upper part and rain in the lower parts of the cloud. o This charge separation depends on the height of the clouds, which range from 0.2 to 10 km, with their charge centres probably at a distance of about 0.3 to 2 km o ...
