

Energy storage after-sales service manager

Flexible, scalable design for efficient energy storage. Energy storage is critical to decarbonizing the power system and reducing greenhouse gas emissions. It's also essential to build resilient, reliable, and affordable electricity grids that can handle the variable nature of renewable energy sources like wind and solar.

We are seeking an accomplished BESS (Battery Energy Storage System) and related products Sales Manager to spearhead our sales initiatives and drive revenue growth. The ideal candidate will have a proven track record in selling energy storage solutions and a deep understanding of the renewable energy and battery storage markets. Job description:

Many people see affordable storage as the missing link between intermittent renewable power, such as solar and wind, and 24/7 reliability. Utilities are intrigued by the potential for storage to meet other needs such as relieving congestion and smoothing out the variations in power that occur independent of renewable-energy generation.
