

We brought you a write-up of the panel, "Growing the Japanese storage market," just over a week ago. Now, it's the turn of "Building BESS in the Philippines," which brought up just as many interesting talking points about a very different but equally important market. The afternoon panel followed the keynote address by Philippines Department of Energy (DOE) ...

The selected battery storage contracts range from 9MW for the smallest to 390MW for the largest. Eligible storage resources must be able to deliver energy to the grid for at least four consecutive hours. The procurement is designed to help Ontario meet electricity demand growth through to the end of this decade and put it on a pathway to cope with a ...

A recently published indicative auction calendar foresees at least 10GW of PV capacity and 8.5GW of wind to be auctioned in Spain in the next five years, with renewables projects paired with storage allowed to participate. While energy storage supported bidders in last year's solar auction in Portugal - which saw the majority of bids ...

The IESO is seeking up to 2,500MW of energy storage capacity as well as some natural gas to help meet projected shortfalls in electricity supply and last month announced 739MW of winning bids, comprising seven standalone energy storage projects.. The systems will provide resource adequacy to the Ontario grid when they go online by the end of 2025, and ...

The announcement marks the beginning of Spain's new auction mechanism, which foresees a total of around 19.4GW of renewables to be assigned through auctions between now and 2025, with at least 10GW of that capacity to be solar PV. The pay-as-bid system will allow hybridisation between technologies and be compatible with energy storage.

ENGIE had submitted the lowest bid in the third round of the Micronesian Island's competitive renewable tender programme to earn the right to a 20-year power purchase agreement (PPA). ... NHOA said its energy storage business line achieved EBITDA breakeven in the first half this this year, reporting EUR1.8 million (US\$1.84 million) positive ...

As reported by Energy-Storage.news earlier this month as Federal energy minister Chris Bowen and energy ministers from Australian states and territories met and decided in principle to launch a scheme to tender for dispatchable renewable energy on a competitive basis.. It is also expected that a Renewable Energy Storage Target (REST) scheme will be ...

The prices for successful bids ranged between EUR0.0678/kWh (US\$0.073/kWh) and EUR0.0917/kWh and

the average volume-weighted price was EUR0.0833/kWh, which the Bundesnetzagentur said was "well below" the maximum tendered price. The auction sought solar-plus-storage projects on arable grasslands, with different criteria offered for different states. ...

This report analyses the winning bid price trends of energy storage systems and turnkey EPCs in China's grid-scale and C& I energy storage market in H1 2024. It is based on the prices from all the publicly announced winning bids from January 2023 to May 2024 by different districts, project types and storage duration.

The weight average winning bid in this round was EUR46,680/MW/year. Research firm LCP Delta wrote a deep-dive into the dynamics which would play out in the second round for Energy-Storage.news in September. Energy-Storage.news" publisher Solar Media will host the 9th annual Energy Storage Summit EU in London, 20-21 February 2024. This year it ...

An energy storage business representative from an unnamed listed company told 36Kr that the cost of battery cells accounts for a major proportion in energy storage systems. In a 0.5C system, the cost of battery cells can account for up to 90%. ... and the scale of winning bids was far lower than that of BYD, reflecting the delicate balance of ...

Energy-Storage.news proudly presents our sponsored webinar with GridBeyond, on successful battery storage trading strategies in the ERCOT and CAISO markets. ... Canadian Solar win approvals for solar-plus-storage in New South Wales, Australia. November 12, 2024 ... This site is operated by a business or businesses owned by Informa PLC and all ...

Columbus will continue to oversee the development process until the project reaches ready-to-build (RTB) status, which is expected this year and will result in an additional bonus payment from DTEK, which has both power generation and retail utility businesses. The 133MW power, 532MWh project won a capacity market contract in December 2022 for ...

The bidding volume of energy storage systems (including energy storage batteries and battery systems) was 33.8GWh, and the average bid price of two-hour energy storage systems (excluding users) was \$1.33/Wh, which was 14% lower than the average price level of last year and 25% lower than that of January this year.

Numerous solar-plus-storage projects that won contracts in the 2020/21 Tender have come online or started construction this year, as reported by Energy-Storage.news. Developers Enerparc and Qair commissioned projects in March and April respectively while renewable energy firm ABO Wind and two utilities launched the construction of projects in ...

The capacity market is set to kickstart the large-scale BESS market in Poland by providing the basic building

blocks of the business case, according to numerous delegates interviewed by Energy-Storage.news at Energy Storage Summit Central Eastern Europe (CEE) 2023 in Warsaw in September.

Greenko's winning submission is for a 500MW/3,000MWh pumped hydro energy storage (PHES) plant. It will serve NTPC REL under a 25-year contract, with the power generation company seeking to use the long-duration energy storage (LDES) resource to offer 24/7 "round-the-clock" clean energy to customers such as large corporates and utilities.

Energy-Storage.news" publisher Solar Media will host the 1st Energy Storage Summit Asia, 11-12 July 2023 in Singapore. The event will help give clarity on this nascent, yet quickly growing market, bringing together a community of credible independent generators, policymakers, banks, funds, off-takers and technology providers.

The announcement of the four preferred bidders under the first bid window of the Battery Energy Storage Independent Power Procurement (BESIPPP) Programme marks a "significant development" in South Africa's pursuit for energy security. This is according to Mineral Resources and Energy Minister Gwede Mantashe's written remarks at the announcement of ...

In the past three months multiple BESS (Battery-based Energy Storage system) tender results have pointed to yet another mini-disruption in the fast-evolving Indian renewable energy sector. Energy storage targets for 2028 might be a lot closer in 2026 itself. The price drops have been attributed primarily to falling lithium cell costs, which have led to [...]

However, according to a source Energy-Storage.news spoke to, it is very likely to be JSW Renew Energy Five, a subsidiary of JSW Energy, which is in the portfolio of Indian conglomerate JSW Group. JSW Group won SECI's first pilot tender for standalone battery storage, splitting the 1,000MWh capacity across two equally sized 250MW/500MWh ...

Concerning utility-scale energy storage, there is a pressing need for its deployment. Additionally, the crucial role played by grid-side energy storage installations, dominated by standalone and shared energy storage, is expected to be a significant driver for the growth of utility-scale storage. Projections for New Installations of ESS in 2024

Over a gigawatt of bids from battery storage project developers have been successful in the first-ever competitive auctions for low-carbon energy capacity held in Japan. A total 1.67GW of projects won contracts, including 32 battery energy storage system (BESS) totalling 1.1GW and three pumped hydro energy storage (PHES) projects totalling 577MW.

That BESS project was an 8-hour duration lithium-ion (Li-ion) project submitted by RWE, with 50MW output to 400MWh capacity, as reported by Energy-Storage.news in May. 980MW/2790MWh of BESS, 95MW of

## Energy storage business winning bid news

VPP win contracts. This time out, there were no long-duration energy storage (LDES) winners.

A large-scale solar-plus-storage plant in California, US, recently brought online through Canadian Solar's US subsidiary Recurrent Energy. Image: Recurrent Energy. Canadian Solar was behind the company Zapalero that received a successful bid in Chile's July auction with 253MWp of solar PV and 1GWh battery energy storage.

Enerland bid EUR11.14/MWh (US\$13.12), or US\$0.0131/kWh, for a 10MW lot in last week's auction, below the most recent industry record tariff of US\$0.0135/kWh set by the Al Dhafra project in Abu Dhabi in April.. Of the total 700MW available, Q CELLS was awarded 315MW, winning six of 12 lots available.
