

# Energy storage companies nyc

Why is New York a great place to invest in energy storage?

Promoting New York's world-class intellectual and manufacturing capabilities and providing access to markets to grow the energy storage industry in New York.

Are energy storage systems regulated in New York?

Energy storage technologies and systems are regulated at the federal, state, and local levels, and must undergo rigorous safety testing to be authorized for installation in New York. You can download NYSERDA's New York State [PDF] and New York City [PDF] factsheets to learn more about energy storage regulations and safety in your community.

What is New York state's energy storage goal?

This Order formally expands the State's goal to 6,000 Megawatts of energy storage to be installed by 2030, and authorized funds for NYSERDA to support 200 Megawatts of new residential-scale solar, 1,500 Megawatts of new commercial and community-scale energy storage, and 3,000 Megawatts of new large-scale storage.

Why is energy storage important?

To achieve New York's climate goals, it's clear energy storage will play an important role in the electric grid & transportation system of the future. We work to ensure that markets are developed fairly & with an eye towards enabling a clean energy future. Discover more about our history, mission, leadership, and more.

Are EnergySage storage installers pre-screened?

At EnergySage, we care about connecting shoppers to high-quality companies. As such, any storage installers we list above are active on the EnergySage Marketplace in New York and pre-screened by our team. What does it mean to be "pre-screened"? We evaluate every storage installer to ensure that they'll provide quality service to EnergySage users.

Should energy storage be included in the electric grid?

Integrating storage in the electric grid, especially in areas with high energy demand, will allow clean energy to be available when and where it is most needed. As New York continues to invest and build a cleaner grid, energy storage will allow us to use existing resources more efficiently and phase out the dirtiest power plants.

The 4.8 MW/16.4 MWh battery located in Brooklyn will support the local grid with its energy reserve during times of peak demand, improving network reliability and contributing to New York's plans to deploy 3 GW of energy storage by 2030; Boston and New York, December 9, 2019 - Enel X, the Enel Group's advanced energy services business ...
