Incentives decline over time, so the amount of your rebate depends on when you install storage. Incentive rules prohibit energy storage systems from being used solely as backup power. Program rules require commercial energy storage systems to discharge a minimum 52 times per program year to be eligible for the incentive.

Powerwall, in conjunction with a Backup Gateway 2, Backup Switch or Gateway 3, will power the home during a grid outage. When the system is installed with solar, Powerwall stores the excess solar energy produced to power the home when the sun isn't shining. Installation should only be performed by a Tesla Certified Installer.

Backup Gateway 2 Power Supply. When paired with a Backup Gateway 2, the Tesla Powerwall 2.0 can provide your home with nearly uninterrupted power supply the moment a power outage occurs. When the power goes out, the Powerwall 2.0 disconnects briefly and restores backup power to your home within a

fraction of a second.
