Engineering execution will be your primary activity - creating new products for Nuvation and our customers, bringing into the world products that never existed before. Technical Development - Developing your

technical skills, knowledge and leadership through a work environment that provides mentoring and open collaboration.

The Technical Support Engineer will support customers by improving the technical and the operational performance of company products. The successful candidate will be familiar with energy storage systems or have experience in a related electrical field. A deep understanding of electrical hardware and electronics is required for this role.

Typical differentiators are residential vs industrial energy storage, and low vs high voltage. The most relevant standards for industrial storage include IEC62619, UL1973, UL9549 and VDE-AR-E 2510-50. Product and functional safety are the most important aspect of these standards.

Staying current with the latest trends and advancements in hardware technology is essential for a successful hardware design engineer. Interviewers ask this question to gauge your commitment to continuous learning and your ability to adapt to the ever-evolving landscape of hardware engineering.

This role will be directly involved in the product development engineering of utility scale energy storage solutions, including: ... and balance of plant hardware) and integrated commercial and prototype systems ... controls engineering, and/or product development experience with energy storage, PV systems, microgrids, or other integrated DC/AC ...

Who We Are. Fluence is a global market leader in energy storage products and services, and cloud-based software for renewables and storage. With a presence in over 47 markets globally, Fluence provides an ecosystem of offerings to drive the clean energy transition, including modular, scalable energy storage products, comprehensive service offerings, and AI-enabled ...
