What is a Power Conversion System (PCS)? If you want your Utility scale BESS (battery energy storage system) installation to function efficiently, you need a Power Conversion System to convert the power from AC to DC and vice versa. The PCS, is a bi-directional inverter that enables the batteries to charge and discharge with precision control.

This allows for the integration of battery storage with the electricity grid or other power systems that usually operate on AC. ### Functions of PCS in a BESS System: 1. \*\*DC to AC Conversion (Inverter Mode)\*\*: When the stored DC energy in the battery needs to be supplied to the grid or a load, the PCS converts it into AC. 2.
