

Ev ebitda multiple for renewable energy

The most commonly used multiples are EV/EBITDA and EV/EBIT. Analysts use exit multiples to estimate the value of a company by multiplying financial metrics such as EBIT and EBITDA by a factor that is similar to that of recently acquired companies. Exit multiple is sometimes referred to as terminal exit value.

The STOXX Europe TMI increased by 7.5% since the beginning of 2023. In terms of EV/EBITDA, multiples have generally remained relatively stable during the first quarter of 2023, with a few industries presenting significant variations.
