

# Family mart energy storage building store

Thermal energy storage (TES) is one of the most promising technologies in order to enhance the efficiency of renewable energy sources. TES overcomes any mismatch between energy generation and use in terms of time, temperature, power or site [1]. Solar applications, including those in buildings, require storage of thermal energy for periods ranging from very ...

FamilyMart stores sell typical Japanese convenience store goods, including basic grocery items, magazines, manga, soft drinks, alcoholic drinks like sake, nikuman (steamed pork buns), fried chicken, onigiri/omusubi (rice balls), and bento. Where (  $\overline{C}_p$  ) is the average specific heat of the storage material within the temperature range. Note that constant values of density  $\rho$  ( $\text{kg}\cdot\text{m}^{-3}$ ) are considered for the majority of storage materials applied in buildings. For packed bed or porous medium used for thermal energy storage, however, the porosity of the material should also be taken into account.

Energy storage, such as battery storage or thermal energy storage, allows organizations to store renewable energy generated on-site for later use or shift building energy loads to smooth energy demand. With a large
