

First solar series 6 plus

Why should you choose first solar series 6?

Superior Return. First Solar Series 6 photovoltaic (PV) modules set the industry benchmark for reliable energy production, optimized design and environmental performance. Series 6 modules offer an advanced design that is optimized for every stage of your application, significantly reducing balance of system, shipping and operating costs.

What is the difference between Series 6 Plus and first solar?

First Solar and the First Solar logo are trademarks of First Solar, Inc., registered in the U.S. and other countries. Series 6 Plus is a trademark of First Solar, Inc. First Solar reserves the right to make changes in solar module design and/or specifications at any time without notice.

What is a series 6 solar system?

Series 6 modules are manufactured under one roof with a 100% traceable QA/QC program that results in a globally consistent and high-quality product. First Solar is a leading global provider of comprehensive photovoltaic (PV) solar energy solutions that are truly Taking Energy Forward.

What does series 6 Plus mean?

Series 6 Plus is a trademark of First Solar, Inc. First Solar reserves the right to make changes in solar module design and/or specifications at any time without notice. Accordingly, the reader is cautioned to verify that data sheets are current before placing orders or finalizing system permitting and/or design.

What is a series 6 Plus module?

Series 6 Plus modules are tested and certified per IEC 61215-1/IEC 61215-1-2/IEC 61215-2 for a maximum system voltage of 1500 VDC. Each module is equipped with a product label on the back and laser-etched identification on the front glass. The label identifies the model number, nameplate electrical ratings, and safety information.

Are series 6 Plus modules compatible with inverters?

Series 6 Plus modules are compatible with a range of string, central, transformer, and transformerless inverters. When connecting modules or module strings in series ensure inverter ratings are appropriate. Do not exceed system design voltage and inverter design specifications when connecting modules in a series string.

Series 6 Plus Bifacial. 455-480 Watt Thin Film Solar Module First Solar is once again setting the industry benchmark for reliable energy production, optimized design and environmental performance with Series 6 Plus Bifacial - the world's first bifacial thin film CdTe module. The advanced design significantly reduces balance of system,

First solar series 6 plus

SOLAR, INC. | MPD-00594 -06 -G REV 2.3 OCTOBER 2 023 . Plus. NOTICE . First Solar reserves the right to make changes in solar module design and/or specifications at any time

First Solar Series 6 Plus ADVANCED THIN FILM SOLAR TECHNOLOGY MORE LIFETIME ENERGY PER NAMEPLATE WATT o Industry"s best (0.3%) warranted degradation rate o Superior temperature coefficient, spectral response and shading behavior o Unlike crystalline silicon modules, First Solar"s thin film

FIRST SOLAR First Solar Series 6 Plus and Series 6 Plus Bifacial Modules | USER GUIDE i of 27 FIRST SOLAR, INC. | MPD-00 895 -06 -G REV 2.4 . Plus. NOTICE . First Solar reserves the right to make changes in solar module design and/or specifications at any time

Series 6 Plus. 455-480 Watt Thin Film Solar Module First Solar Series 6 Plus photovoltaic (PV) modules set the industry benchmark for reliable energy production, optimized design and environmental performance. The advanced design is optimized for every stage of your application, significantly reducing balance of system, shipping, and operating ...

First Solar Series 6 Plus ADVANCED THIN FILM SOLAR TECHNOLOGY PROVEN PERFORMANCE o With superior temperature coefficient, spectral response and shading behavior, Series 6 Plus modules generate up to 8% more energy per watt than conventional crystalline silicon solar modules

This document provides information on First Solar Series 6 Plus modules of model types beginning as FS-6XXX-P ("XXX" references the module power rating) for system designers, installers, and maintenance personnel. Model types including "A" contain an anti-reflective coating (ARC) on the front side surface.

First Solar Series 6 and Series 6 Plus photovoltaic (PV) modules set the industry benchmark for reliable energy production, optimized design and environmental performance. Up to 480 Watts. Up to 19.0% Efficiency. 30 Year Linear Performance Warranty. 0.3% Warranted Annual Degradation Rate.

The First Solar Series 6 Plus PV modules are leading the industry in terms of dependable energy production, efficient design, and environmental sustainability. The advanced design has been optimized for all aspects of use, resulting in significantly lower costs for balance of system, shipping, and operation. ...

First Solar Series 6 ADVANCED THIN FILM SOLAR TECHNOLOGY MORE LIFETIME ENERGY PER NAMEPLATE WATT o Industry"s best (0.3%) warranted degradation rate o Superior temperature coefficient, spectral response and shading behavior o Unlike crystalline silicon modules, First Solar"s thin film

and First Solar Series 6 Plus Modules of model types FS-6XXX-P and FS-6XXXA-P for system designers, installers, and maintenance personnel ("XXX" references the module power rating). Model types including "A" contain an anti-reflective coating (ARC) on the front side surface. Series 6 Modules and Series 6 Plus

FIRST SOLAR SERIES 6 PLUS(TM) MODEL TYPES: FS-6XXX-P / FS-6XXXA-P / FS-6XXX-P-I /

First solar series 6 plus

FS-6XXXA-P-I (XXX = NOMINAL POWER) RATINGS AT STANDARD TEST CONDITIONS (1000W/m², AM 1.5, 25°C) IEC 61215:2016 & IEC 61730-1:2016, CE 61701 Salt Mist Corrosion 60068-2-68 Dust and Sand Resistance Open Circuit Voltage REGIONAL CERTIFICATIONS Short ...

First Solar Series 6 Plus photovoltaic (PV) modules set the industry benchmark for reliable energy production, optimized design and environmental performance. The advanced design is optimized for every stage of your application, significantly reducing balance of system, shipping, and operating costs.

Series 6 Plus Bifacial . 455-480 Watt Thin Film Solar Module First Solar is once again setting the industry benchmark for reliable energy production, optimized design and environmental performance with Series 6 Plus Bifacial - the world's first bifacial thin film CdTe module.

Series 6 Plus . Bifacial. 455-480 Watt Thin Film Solar Module. First Solar is once again setting the industry benchmark for reliable . energy production, optimized design and environmental performance . with Series 6 . Plus. Bifacial - the world's first bifacial thin film CdTe module. The advanced design significantly reduces balance of system,

First Solar Series 6 Plus photovoltaic (PV) modules set the industry benchmark for reliable energy production, optimized design and environmental performance. The advanced design is optimized for every stage of your application, significantly reducing balance of system, shipping, and operating costs. ...

Watt Thin Film Solar Module Series 6 Plus. First Solar Series 6 Plus photovoltaic (PV) modules set the industry benchmark for reliable energy production, optimized design and environmental performance. The advanced design is optimized for every stage of your application, significantly reducing balance of system, shipping, and operating costs.

energy payback, Series 6 modules are the industry's most eco-efficient PV solution. Reduced Maintenance Costs The innovative under-mount frame design provides the cleaning and snow shedding benefits of a frameless module. First Solar Series 6(TM) photovoltaic (PV) modules deliver the highest lifetime energy for large-scale solar projects. For

First Solar Series 6 Plus photovoltaic (PV) modules set the industry benchmark for reliable energy production, optimized design and environmental performance. The advanced design is optimized for every stage of your application, significantly reducing balance of

Innovative Module Design Advanced Thin Film Solar Technology Advanced Design: Series 6 and Series 6

First solar series 6 plus

Plus offer an advanced design that is optimized for every stage of your application, significantly reducing balance of system, shipping, and operating costs.; Extensive Compatibility: Module design provides seamless mounting with common fixed-tilt and tracking applications

455-480 Watt Thin Film Solar Module First Solar Series 6 Plus photovoltaic (PV) modules set the industry benchmark for reliable energy production, optimized design and environmental performance. The advanced design is optimized for every stage of your application, significantly reducing balance of system, shipping, and operating costs.
