Lets check the pros and cons on flywheel energy storage and whether those apply to domestic use (:): Compared with other ways to store electricity, FES systems have long lifetimes (lasting decades with little or no maintenance; [2] full-cycle lifetimes quoted for flywheels range from in excess of 10^5 , up to 10^7 , cycles of use), [5] high specific energy (100-130 ...

The superior NPV of the ES-FCS is valid for a wide variation of the energy capacity cost rate, that is, 200-800 cu/KWh for the battery storage and 2000-10000 cu/kWh for the flywheel storage. Due to the additional investment cost for the ES, the optimal no-ES-FCSs performed better than the ES-FCSs in terms of Internal Rate of Return (IRR ...
