Please note that Ford will not respond to individual feedback.

Revolutionary power at home. Ford Intelligent Backup Power, making its debut on F-150 Lightning, gives customers the ability to use bidirectional power technology \*\* from their all-electric truck to provide energy to their homes during an outage, whether sheltering in a storm or keeping cool in a heat wave.

The concept is that the Tesla PowerWall is installed to charge with solar and if there is an outage it provides primary backup. If the PowerWall is exhausted the SunRun system sees it as a power outage and then the Ford Intelligent Backup system can be activated from the truck.

Home Backup Power Activation. Activating Home Backup Power enables your vehicle to share the power stored in its battery with your home. Home Backup Power activation: Is included with the purchase of F-150 Lightning trucks with an extended range battery. Requires a one-time fee on the Ford Connect Services website for F-150 Lightning trucks ...

Ford's Pro Power Onboard generator launched on the 2021 Ford F-150 and has become an incredibly popular and useful feature in the time since, helping people power their homes during historic winter storms and natural disasters, which has earned it numerous awards in the process. The 2022 Ford F-150 Lightning will take Pro Power Onboard's usefulness a ...

Debuting on F-150 Lightning is available Ford Intelligent Backup Power, turning your truck into the ultimate power source for your home. With the ability to offload 9.6 kW of power, Ford Intelligent Backup Power keeps the lights on during an outage while providing security by powering home appliances, security systems and more.

Here are the cliff notes from the video (answers are Tom's from video, not mine). Video length 37:41. Chapters: 0:00 Intro 2:29 Does Intelligent Backup Power require a 320-amp electric service? No. Website has dropped mention of the 320-amp service and now only says dedicated 100A electrical circuit.

## Ford intelligent backup power modes

Video illustrating the Ford F-150 Lightning's Intelligent Backup Power Ford has introduced the all-new, all-electric 2022 Ford F-150 Lightning(TM) truck to its pickup truck lineup for the 2022 model year. Available at a starting MSRP of \$39,974, the F-150 Lightning is equipped with a wide range of connected and intelligent features. The Ford Charge Station [...]

The upcoming Ford F-150 Lightning's lithium-ion battery pack can power more than just the truck itself. While it can work as an electric generator to power various tools or other devices at the worksite, it can also power your entire home. Ford calls the available feature Intelligent Backup Power.

For #1, you need an interconnection agreement with the utility and be able to operate in a grid-parallel mode. The hardware should be able to handle that, but to my knowledge Ford/SunRun are only installing in an islanded-mode. Not sure if that's because the hardware or system can't do it, or if Ford doesn't want customers to use it that way.

Back in February, FoMoCo outlined how, exactly, the new Ford Intelligent Backup Power feature would work with the Ford F-150 Lightning and the 80-amp Ford Charge Station Pro and Home Integration System. Ford Intelligent Backup Power allows owners to store up to 131 ...
