GE Vernova's Wind segment is focused on delivering a suite of wind products and services to help accelerate a new era of energy by harnessing the power of wind. The business segment comprises of the Offshore Wind, Onshore Wind, and LM Wind Power businesses.

For a century, utilities have relied on us to deliver electrical products and services to meet their quality, durability and performance needs. Our capacitor and reactor product lines are an integral part of our portfolio. GE Vernova provides power capacitors that meet ANSI, IEEE and IEC standards, and our low voltage capacitors are UL listed.

GE Renewable Energy was a manufacturing and services division of the American company General Electric. It is headquartered in Boulogne-Billancourt, near Paris, France and focuses on the production of energy systems that use renewable sources. Its products include wind (onshore and offshore), hydroelectric and solar (concentrated and photovoltaic) power generating facilities. In 2024, GE Renewable Energy and GE Power merge to create GE Vernova, a company comple...

November 8, 2018, New Orleans, LA - LM Wind Power, a unit of GE Renewable Energy (NYSE: GE), today announced the inauguration of a new Technology Center Americas facility to develop and test new techniques for designing and building wind turbine blades at its facility on the NASA Michoud campus outside of New Orleans, Louisiana. The new ...

The entity was created as developer (not manufacturer) Zond in 1980 by James G.P. Dehlsen, who also formed Clipper Windpower in 2001. Enron acquired Zond and the German manufacturer Tacke Windtechnik in 1997.. In 2002, while gas turbine sales were declining, [3] GE acquired the Enron Wind, the only surviving US manufacturer of large wind turbines at the time, during the ...
