

Investing in water storage

How to invest in water?

Invest in stocks, fractional shares, and crypto all in one place. A logical place to begin a list of water investments is with utilities. These companies offer a measure of diversification to a portfolio because people and businesses will need water regardless of economic conditions.

Why did the interior invest \$105 million in water conservation & efficiency?

WASHINGTON -- The Department of the Interior today announced a nearly \$105 million investment as part of the President's Investing in America agenda for 67 water conservation and efficiency projects that will enhance drought resilience across the nation. The investment comes from the Bipartisan Infrastructure Law and annual appropriations.

Should you invest in water solutions?

A quick guide to investing in water solutions. As access to clean water becomes ever more scarce, a thematic investment opportunity arises. Water contributes significantly to industries such as agriculture, food production, and even semiconductor manufacturing. It is a scant resource without many alternatives.

Why should investors invest in water stocks?

Scarcity is a main theme for investors in water stocks, and government funding is another important catalyst. In October, the administration of President Joe Biden issued a rule requiring drinking water systems across the U.S. to identify and replace lead pipes within 10 years.

How much money does the US need to invest in water infrastructure?

But that's just a drop in the bucket when it comes to investment for water infrastructure in the U.S. and abroad. In a report to Congress last year, the Environmental Protection Agency estimated that the U.S. will need to invest \$625 billion over two decades in drinking water infrastructure, based on data collected in 2021.

How much does reclamation spend on water infrastructure?

Through the Bipartisan Infrastructure Law, Reclamation is investing a total of \$8.3 billion over five years for water infrastructure projects, including rural water, water storage, conservation and conveyance, nature-based solutions, dam safety, water purification and reuse, and desalination.
