These boxes are made to our specs using heavy 1mm thick aluminum sheeting, ribbing for strength, and heavily reinforced top corners made of aluminum castings. They are designed so that like-sized cases can be stacked without them slipping off of each other and all three sizes can be nested together like Russian dolls.

Aluminum redox batteries represent a distinct category of energy storage systems relying on redox (reduction-oxidation) reactions to store and release electrical energy. Their distinguishing feature lies in the fact that these redox reactions take place directly within the electrolyte solution, encompassing the entire electrochemical cell.
