Why are home battery storage systems so popular?

Home battery storage systems have skyrocketed in popularity during the past few years for many different reasons. Besides the obvious fact that they provide clean power, more and more people are recognizing that the grid isn't always reliable.

How many kWh does a battery backup system store?

Comparatively, partial-home battery backup systems usually store around 10 to 15 kWh. Given that power outages are infrequent in most parts of the country, a partial-home battery backup system is generally all you'll need. But, if your utility isn't always reliable for power, whole-home battery backup may be the way to go.
