How do I Activate my lightreach account?

You **MUST** complete your LightReach Contract, Identity, and Direct Debit or ACH payment set up in your account. Typically, we automatically verify that you own the property where the solar system will be installed, but occasionally we will also request documentation on that. Simply click the link in your email to activate your account.

How do I sign up for a lightreach energy plan?

Virtual learning, virtual reality, and now... virtual power plants? When you first sign up for a LightReach Energy Plan, you will receive an email and text message (SMS) to activate your Palmetto account. You **MUST** complete your LightReach Contract, Identity, and Direct Debit or ACH payment set up in your account.

How does lightreach work?

LightReach is designed to save you money. The average monthly savings on your electricity bill will be greater than the price you pay for your energy plan. Your savings compound over the course of your contract, allowing you to build wealth and energy independence without additional costs. Track everything from your personal solar dashboard

Why should you choose lightreach?

Designed with your pocket in mind, LightReach ensures you save more on electricity than what you pay for the solar plan. Watch your savings multiply over your plan's term, enhancing your fiscal health and energy autonomy without extra outlay. A quarter-century energy plan may sound daunting.

How can lightreach help you get paid faster?

With rates equal to or cheaper than our competitors, LightReach can help you convert more homeowners to solar and get paid faster. The homeowner does **NOT** own the solar system (or qualify for state/federal incentive programs). Instead, they only invest in the energy plan.

Does lightreach offer a lease or PPA?

Instead of dealing with the challenges of rising interest rates and high upfront costs, LightReach offers lease and PPA (depending on the market) financing options so homeowners can benefit from solar savings in year-one. In 2022, energy costs for the average American increased by 14.3% compared to 2021, mainly due to unforeseen rate hikes.

In 2022, energy costs for the average American increased by 14.3% compared to 2021, mainly due to unforeseen rate hikes. LightReach's TPO plan, however, sets a fixed rate escalator between 0.99% - 2.99% per kilowatt hour -- protecting consumers from rate increases and creating long-term savings without the upfront costs.
