It's crucial to understand that not all batteries are created equal when it comes to shipping. Certain types of batteries, like lithium-ion and lithium-metal, pose higher risks due to their energy density and potential for overheating or combustion. This is why there are strict regulations when it comes to shipping lithium batteries internationally

Increasingly powerful, lithium batteries are designed to keep devices running for hours or days at a time. To achieve this, they contain high levels of electric energy. If packed incorrectly or damaged in transit, lithium batteries can short-circuit, causing them to overheat and catch fire. ...
