

Lithium ion battery for vacuum cleaner

What type of battery does a vacuum cleaner use?

In this comprehensive guide to vacuum cleaner batteries we will explore the types of batteries available, the average lifespan and helpful tips for extending their longevity. Vacuum cleaner batteries are primarily Lithium-Ion (Li-ion). Older models might still use Nickel-Metal Hydride (NiMH) or Nickel Cadmium (NiCd) batteries.

Where can I buy a replacement vacuum battery?

BatteryMart.com carries high-quality replacement batteries for vacuums, including popular models from Euro Pro, iRobot, Dyson, and more. All of our vacuum batteries come with a manufacturer warranty and include our 60 day 100% satisfaction guarantee. Keep your Roomba or handheld vacuum going strong with a quality replacement vacuum battery.

What is a cordless vacuum cleaner?

Cordless vacuum cleaners often use rechargeable lithium-ion batteries, which offer superior performance and durability compared to other types. Additionally, they maintain a consistent power output throughout their use. The run time indicates how long a cordless vacuum can work on one charge.

What is a lithium ion battery?

Lithium-Ion batteries are the newer technology and are fast becoming the industry standard. Light weight, which makes for easier handling and manoeuvrability. Have a longer lifespan with no memory effect that can reduce capacity. Have faster charging times and more power-efficient. NiMH and NiCd batteries are rechargeable batteries.

How do you maintain a lithium ion battery?

Lithium-Ion batteries prefer partial discharge cycles rather than constantly being fully discharged. Store your vacuum in a cool, dry place. Extreme temperatures can affect battery performance. Surprisingly, using your vacuum regularly can help maintain battery health so don't let it sit unused for extended periods.
