What is the Lusaka bulk fuel terminal project?

The Lusaka bulk fuel terminal project currently underway in Zambia's capital for Gulfstream FZC from Dubai in the Middle East, consists of eight 15,000 m³ tanks and a 2,000 m³ tank on a co-mingled storage basis.

Why should German and European service providers invest in Zambia?

For German and European service providers active in the energy sector, Zambia presents significant potential for business development. There are clear needs across the solar energy and storage value chain, including project development and financing, equipment manufacturing, system integration and contracting.

How can Zambia reduce its vulnerability to power shortages?

By incorporating nuclear, wind, solar, and coal energy, Zambia can reduce its vulnerability to power shortages and ensure a stable, sustainable energy supply. Remember, this may not be a quick fix to what we are going through, but it may work in the now and years to come ahead.

How can a diversified energy portfolio help Zambia?

The current energy crisis in Zambia, exacerbated by reliance on hydropower and frequent droughts, necessitates a shift towards a diversified energy portfolio. By incorporating nuclear, wind, solar, and coal energy, Zambia can reduce its vulnerability to power shortages and ensure a stable, sustainable energy supply.

Is solar energy a good investment in Zambia?

Solar energy is abundant in Zambia, ideal for power generation due to high solar irradiance. Solar energy systems are scalable, ranging from small to large installations, and require minimal upkeep with low operating costs. However, the initial installation costs can be high, and solar power is dependent on daylight and weather conditions.

Can battery storage be used with solar photovoltaics in Zambia?

The Zambian regulation foresees customs duty and VAT exemptions for most equipment used in renewable energy or battery storage projects. Detailed information is provided in In this section, we discuss the opportunity of battery storage in combination with solar photovoltaics from a financial point of view.

Vahid Fotuhi, managing director of Access Power commented: "By bringing this pioneering project to fruition with the support of USTDA we aim to diversify Zambia's energy mix and tap into its vast clean energy power generation potential in order to help fuel its economy development and satisfy the urgent need for electrification."

Figure: SGIP's Installed Capacity of Energy Storage in California (MW/MWh) U.S. Energy Storage The installed capacity of energy storage in the first quarter of 2023 surged to an impressive 792.3 MW/2144.5

Lusaka energy storage business overseas energy storage business

MWh, according to data from Wood Mackenzie. This reflects a year-on-year increase of 6.1%.

Last year, its energy storage business had a gross profit margin of 37.47%. In comparison, Hyper Strong, which mainly focuses on domestic large-scale energy storage business, had a gross profit margin of 20.02% in 2023. This also reflects the significant profitability gap between domestic and overseas large-scale energy storage markets.
