How much energy storage capacity does the energy storage industry have?

New operational electrochemical energy storage capacity totaled 519.6 MW/855.0 MWh (note: final data to be released in the CNESA 2020 Energy Storage Industry White Paper). In 2019, overall growth in the development of electrical energy storage projects slowed, as the industry entered a period of rational adjustment.

Will electrochemical energy storage grow in China in 2019?

The installation of electrochemical energy storage in China saw a steep increase in 2018, with an annual growth rate of 464.4% for new capacity, an amount of growth that is rare to see. Subsequently, the lowering of electrochemical energy storage growth in China in 2019 compared to 2018 should be viewed rationally.
