What are the best portable power stations?

To help you decide, I tested the efficiency, in a variety of scenarios, of the best portable power stations from Jackery, EcoFlow, Anker, Goal Zero, Bluetti, Dakota Lithium, Lion Energy, Vtoman, and Ugreen. What to Know Before Purchasing a Portable Power Station

What can a portable power station Power?

A portable power station can power your phone, computer, or even your refrigerator. We researched the best portable power stations to help you decide which is right for you.

How long does a portable power station last?

One cycle means using the product from fully charged to zero charge (or at least 80% in some cases). If you use your portable power station several times a week, it might only last a year or two. If you use it less frequently, it could last for much longer. What can you run on a portable power station?

Are portable power stations safe?

That's where portable power stations come in. While traditional generators are typically powered by gas and are only for outside use, these power stations provide electricity from large batteries that are safe to use indoors. Plus, they're fairly easy to transport, so you can actually take them with you on off-the-grid excursions.

How much power can a portable power station hold?

While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story. The best portable power stations also have an onboard computer that shows you how much energy is left in your unit, as well as how much power it's currently using.

Are portable power stations better than gas-powered generators?

In an emergency, these power stations offer some major advantages over gas-powered portable generators, despite being less powerful. Portable power stations are silent and don't produce additional emissions, so you can use them safely indoors and while you're sleeping.
